SRINIDHI SRINIVASAN

AI / ML Engineer | Agentic AI and Distributed Systems | 5G RAN Systems Engineering

+91-7338711182 | srinidhisrinivasan2001@gmail.com | Bengaluru, India
LinkedIn: linkedin.com/in/srinidhi-srinivasan-2757611a6 | GitHub: github.com/Srinidhi-21
Open to relocation to Germany | Spouse Visa (Family Reunification) from early 2028 | IELTS 7.5/9

PROFESSIONAL SUMMARY / BERUFLICHES PROFIL

Software Engineer with 3 years of experience in 5G RAN systems and distributed software engineering, with a strong parallel track in machine learning, blockchain, and agentic AI. Built and shipped production-grade systems at Dell Technologies across telecom infrastructure and AI-driven fraud detection, with research contributions recognised through 4 IEEE publications, an Indian patent, and a Dell hackathon award. Seeking AI/ML Engineer or Agentic AI roles in Germany, bringing telecom-domain depth and applied AI experience to enterprise and research teams.

TECHNICAL SKILLS / TECHNISCHE KENNTNISSE

AI and ML: Machine Learning, Deep Learning, TensorFlow, Keras, PyTorch, Agentic AI, LLM concepts, NLP, Computer Vision, scikit-learn, OpenCV, Feature Engineering, Model Deployment, Data Analysis, ML Classification Systems

Blockchain: Smart Contracts, Ethereum, Polygon, Solidity, MetaMask, Truffle Ganache - applied to fraud detection and audit systems; Mathematical Foundations of Cryptography

Cloud and DevOps: AWS (Solutions Architect - expected 2026), Google Cloud Platform (GCP), Docker, Kubernetes, CI/CD, Microservices, Linux, Git

Languages: C, C++, Python, Java, Kotlin, JavaScript, HTML, CSS, XML

Telecom and 5G: 5G RAN, 3GPP Standards, Distributed Unit (DU), UE Logs, Network Trace Analysis, GNSS

APIs and Protocols: REST APIs, gRPC, MQTT, UART, TCP/IP, HTTP

Tools: Jupyter Notebook, Android Studio, IntelliJ IDEA, JIRA, Google Colab, MySQL

Soft Skills: Analytical Thinking, Cross-functional Collaboration, Agile/Scrum, Technical Writing

PROFESSIONAL EXPERIENCE / BERUFSERFAHRUNG

Software Engineer 2 | Dell Technologies | Bengaluru, India *Dec 2024 - Present*

AI-Driven Detection Systems · 5G RAN Distributed Unit (DU) · 3GPP SA · C/C++ · Telecom Software

- Architected and delivered an AI-driven GNSS Denial detection module with end-to-end model deployment in cross-functional collaboration with Canada-based teams, applying ML classification techniques to real-time telecom signal data
- Engineered and delivered 10+ production features for 5G RAN Distributed Unit (DU) systems in C/C++, aligned with 3GPP Release 15/16 standards, improving system compliance and reducing integration issues by 30%
- Debugged and resolved 15+ critical software defects using UE logs, product logs, and network interconnect traces, reducing defect backlog and improving release quality
- Automated feature validation workflows using scripted pipelines, cutting manual testing time by approximately 20% across deployment cycles; contributed to code reviews and Agile/Scrum sprint planning
- Contributed to patent-oriented innovation activities, enhancing Dell IP portfolio in AI and 5G security domains

Graduate Intern - Software Engineer | Dell Technologies | Bengaluru, India *Jul 2023 - Nov 2024*

Telecom Software · 5G · C/C++ · Log Analysis · Agile

- Developed and tested software modules for 5G telecom systems in C/C++ and Python, contributing to pre-release feature validation in large-scale enterprise environments
- Conducted structured log analysis and debugging workflows; authored unit test cases and maintained technical documentation for 5G RAN features

Blockchain Research Intern | MIT Square / Raj Square Foundation | Bengaluru / London *May 2020 - Apr 2021*

Blockchain · Smart Contracts · Solidity · Python · IEEE Research

- Designed and deployed blockchain applications in Solidity and JavaScript, including a cryptocurrency trading platform and a real-time Bitcoin alert system integrated with IoT sensors
- Authored and published 3 IEEE papers; contributed to an Indian patent filing (Application No. 202241030914 A); recognised as Women Intern of the Year for innovative R&D contributions

IoT Intern | ExpertsHub | Bengaluru, India *Jan 2021 - Feb 2021*

IoT · AWS · MQTT · Python (concurrent with Blockchain Internship)

- Built and deployed a Smart Weather Monitoring and Alert System using AWS IoT, MQTT, Node-RED, ThingsBoard, and IFTTT, enabling real-time environmental alerts with under 2 seconds latency

EDUCATION / AUSBILDUNG

M.Tech - Computer Science and Engineering (2022-2024) Vellore Institute of Technology (VIT), Vellore | CGPA: 8.87 / 10 | First Class

B.E. - Computer Science Engineering (2018-2022) Sri Sairam Engineering College, Anna University, Chennai | CGPA: 9.2 / 10 | First Class with Distinction

KEY PROJECTS / SCHLUSSELPROJEKTE

- Swap Shield: AI-driven blockchain audit trail for SIM swap fraud detection - 92% accuracy with model deployment in telecom environment. Tech: Python, ML, TensorFlow, Blockchain, Telecom Security [Dell Technologies, 2025]
- Face Recognition and Mask Detection: ML surveillance solution achieving 95% mask detection accuracy on live video feed using Viola-Jones algorithm and SVM classification. Tech: Python, OpenCV, scikit-learn
- MadeCrypt: Cryptocurrency trading platform with real-time blockchain integration - processed 500+ simulated transactions. Tech: Solidity, Ethereum, JavaScript, REST API
- Decentralised Finance App: Polygon/Ethereum DeFi transaction platform with MetaMask wallet integration. Tech: Polygon, Ethereum, Solidity, MetaMask [Best Project Award - Sri Sairam Engineering College]
- Smart Weather Monitoring: IoT weather alert system with real-time cloud pipeline; alert latency under 2 seconds. Tech: AWS IoT, MQTT, Node-RED, ThingsBoard, Python

ACHIEVEMENTS AND LEADERSHIP / AUSZEICHNUNGEN AND FUHRUNG

- Business Value and Impact Award - Dell Technologies FP5G Hackathon (Dec 2025), for AI-powered blockchain fraud detection system (Swap Shield)
- Best Project Award - Sri Sairam Engineering College (May 2022), for Decentralised Finance App using Polygon/Ethereum blockchain
- Women Intern of the Year - Women Power India Awards 2022 / Raj Square and MSME CCII
- Best Outgoing Student Award - Sri Sairam Engineering College (Mar 2022)
- Vice Chairman - IEEE Intelligent Transportation Systems (ITS) Student Branch (Aug 2021 - Apr 2022)
- National Level TechFest Nutpam - First Place (Jan 2020) | HITS Project Expo - Second Place (Dec 2020)
- Trinity Mirror Newspaper Appreciation for Disruptive Solutions for Vision 2025 (Dec 2020)

PUBLICATIONS AND PATENT / PUBLIKATIONEN AND PATENT

- Face Recognition and Mask Detection Technology for Surveillance System - IEEE (Feb 2022)
- A Machine Learning Model for Accurate CPR Chest Compression Feature Extraction - IEEE (Jul 2022)
- Bitcoin Alert System using Bolt IoT integrated with Blockchain - IEEE Xplore (Dec 2020)
- Hierarchical Design and Execution of Smart Contracts - IEEE Xplore (Dec 2020)
- Indian Patent: System and Method for Bitcoin Alert System using Bolt IoT Integrated with Blockchain Model to Protect Bitcoin Exchanges over Cloud | Application No. 202241030914 A | Issued Jun 2022

CERTIFICATIONS / ZERTIFIZIERUNGEN

- AWS Solutions Architect - Associate (expected 2026) | Amazon Web Services
- Introduction to TensorFlow for AI, Machine Learning and Deep Learning - Coursera
- Applied Machine Learning in Python - Coursera
- Machine Learning Onramp - MathWorks
- Deep Learning Onramp - MathWorks
- Deep Learning with Keras and TensorFlow in Python and R - Udemy
- Google Cloud Platform Fundamentals: Core Infrastructure - Coursera
- Python for Data Science - IBM
- Mathematical Foundations for Cryptography - Coursera
- Blockchain Basics - Coursera
- Foundational Artificial Intelligence - NASSCOM FutureSkills
- Cybersecurity and IoT - Coursera
- Introduction to 5G - LinkedIn Learning

LANGUAGES / SPRACHEN

English - Professional (C1, IELTS 7.5/9) | Tamil - Native | Hindi - Limited Working Proficiency | German - A1 (actively learning; targeting B1 by end of 2026)
